**Re: Resumption of Full Power Operation
Television Station KNVA, Austin, Texas
Facility ID No. 144**

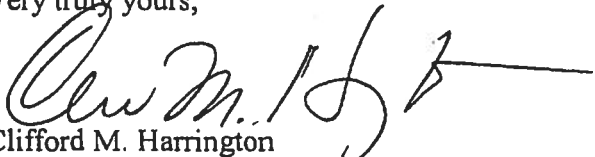

On behalf of our client, 54 Broadcasting, Inc., this is to advise the Commission that commercial broadcast television station KNVA, Channel 49 (Virtual Channel 54), FCC Facility ID 144, Austin, Texas, has resumed operation with full authorized power.

As we advised the Commission via letter dated October 7, 2011, KNVA experienced a tube failure on September 28, 2011, that prevented the station from achieving stable full power operation, resulting with operation at a reduced power level of 325 kW.

Repairs have now been effectuated and the station has been restored to full power operation.

Please address any questions concerning this matter to the undersigned.

Very truly yours,

Clifford M. Harrington
Counsel to 54 Broadcasting, Inc.
